

Micro P2 drive with with 2 P2 card slots

AJ-MPD1

Get fast access to microP2 content with the dual-slot AJ-MPD1 microP2 memory card drive. This affordable offload solution allows you to reliably transfer content from microP2 cards directly onto a laptop or computer via USB 3.0. Designed for durable performance in the field, the MPD1 features a ruggedized encasing and comes with single USB 3.0 cable for both data and power, so no separate power supply is required. With a 64GB microP2 card inserted, the MPD1 can offer immediate access to more than four hours of DVCPRO, two hours of DVCPRO50 or AVC-Intra 50, or more than an hour of DVCPRO HD or AVC-Intra 100 content. The AJ-MPD1 also supports Panasonic microP2 system content protection system (CPS) which effectively locks the microP2 content with a password, insuring it's safely. Only P2 equipment with the same password could read the content from that card. Users benefit from the knowledge that even if their card is lost others can not view their content. The MPD1 is compatible with Windows 7, XP, Vista and Mac OS X operating systems. It works with all microP2 card sizes and supports all current P2 formats and frame rates in HD and SD, as well as Panasonic's newest compression platform, up to the AVC-Intra200 mode of AVC-ULTRA, which will be available within 2013. Key features / benefits

- Ultra fast contents transfer over USB3.0 (up to 2GB)
- Compact and lightweight for field

Key Features

Fast data transfers

USB 3.0

No need for external power supply
