

Memory Card "expressP2 card" B Series 256 GB

AU-XP0256BG

Highly reliable, professional memory cards for 4K/high-speed frame rate recording with the VariCam Series

Key Features

The new cards have a potential maximum 10 Gbps data transfer speed, approximately 4 times as fast as previous models.

The P2 card connector is also clearly superior to that of PC cards, with a durability that enables approximately 30,000 insertion/removal cycles.

The new cards feature an error correction capability equivalent to the RAID system, which restores sector/page error data that cannot be corrected with ordinary flash memory.

The reliability that only a semiconductor memory can offer resists impacts, vibrations, and temperature fluctuations to enable repeated use.

An individual serial number, bar code, and write-protect switch make it easy to manage operations.

Capacity	Approx. 256 GB
Interface	PCI Express Base Specification
Supply Voltage	DC 3.3V±0.15V
Power Consumption	Approx. 3.3 W
Operating Temperature	0 °C to 60 °C (32°F to 140°F)
Operating Humidity	10% to 90 % (no condensation)
Storage Temperature	-40 °C to 80 °C (-40°F to 176°F)
Storage Humidity	5% to 90 % (no condensation)
Weight	Approx. 55 g (approx. 1.94 oz)
Dimensions	W 54 mm x H 7.5 mm x D 85.6 mm (2.13 inches x 0.3 inches x 3.37 inches)
