

The Panasonic arc welding robot cell PERFORMARC H-frame is developed to meet requirements of various industry applications.

PERFORMARC PA-H-Frame-2500

The system design allows for the coverage of a wide range of different sized work components by utilizing twin workstation manipulation. The cell comprises of the latest technically advanced Panasonic robot and welding components seamlessly integration into a system configuration for simple user-friendly control. The torsion-free base frame design ensures accurate position location of the robot and work piece manipulation providing the capability to pick up and move the total system without any need of programming correction.

Key Features

wide range of different sized work components

latest technically advanced Panasonic robot and welding components

simple user-friendly control

accurate position location
