

Easy to Apply Out of Stock Detection

Captana

Enterprise IoT Sensor Fusion + Computer-Vision Platform. Captana is a cloud-based software combined with an IoT camera and sensor system that detects the on shelf availability situation and analyzes the shelf to improve shelf availability and internal processes and reduce waste.

Key Features

Paperless commerce

Influencing responsible consumption at the shelf

Increased availability of products

Planogram compliance

Early detection of anomalies

Stockouts alerts in real-time

Captana

Battery	Rechargeable Batterie
Easylock Protection	Correct Position: Patented easylock gurantees the position on the shelf
Applicable Lens	Autofocus Lens
LED	Configurable Status LED
Sensor	Motion Sensor helps to save battery and prevents GDPR compliant an image from being captured while motion is detected.
Casing	Rugged Casing
Field of View	Up to 250 products with 1 ShelfEye
	Up to 5 meter of Shelf can be monitored
	AI Controlled Autofocus of the Lense
	12 Mega Pixel Camera Resolution
	NFC Wifi Setup
	Fully manageable via Captana Live App
	V:IoT Ultra Low Power Communication Protocol
