

Innovative HD shooting solution using 8K camera technology

AK-SHB800

4 independent HD videos can be cropped from a single 8K camera, and each can be panned/tilted/zoomed individually. It serves as virtual 5 HD cameras, including HD down-converted whole image. It enhances shooting efficiency in live/sports/studio applications.

Key Features

Up to 4 independent HD footage can be cropped from a single 8K camera, and each cropped image can be panned/tilted/zoomed individually

8K high-definition/wide-angle image realizes high quality cropping in a wider area

Automatic wide-angle lens distortion correction achieves natural-looking cropped image from anywhere within a whole image

A single operator can produce multiple footage by the linked operation of multiple frames/cameras

Virtual multiple-camera system allows space-saving, easier setup

AK-SHB800
