

**The NPM-W2 combines accurate component placement, precise SPI and AOI inspection and reproductive adhesive dispensing in one high-speed solution.**

## **NPM-W2 / NPM-W2S**

Higher productivity and quality thanks to the integration of printing, placement and inspection processes make the NPM-W2 one of the most flexible and versatile pick-and-place solutions on the market. This machine provides the user with a tool that allows him to choose between high speed or high accuracy, depending on the PCB requirements. In addition, the NPM-W2 is optimised for larger boards and larger components, such as PCBs up to 750 x 550 mm and components up to 150 x 25 x 30 mm (L,W,H). For high productivity, dual lanes can be used. Features The multifunctional NPM-W2 is equipped with a 12-nozzle head and can place 38,500 components. 120 feeders can be mounted. Additionally, the NPM-W2 can automatically inspect solder depots and components according to the production data. As a third function, the NPM can be fitted with the conventional HDF discharge mechanism, which ensures high-quality non-contact dispensing with a screw valve-dispenser. This platform is also available as a single-beam solution: NPM-W2S single beam allows various operations ranging, from NPM-series backup to multiple connection configuration.

### **Key Features**

---

Equipped with a 12-nozzle head and can place 38,500 components

---

Automatical inspection of solder depots and components according to the production data

---

HDF discharge mechanism compatible, which ensures high-quality non-contact dispensing with a screw valve-dispenser

---

Also available as a single-beam solution
