Multi Monitoring and Control Software

Remote control, monitoring, and live status reporting about your projectors and displays fleet from an intranet.
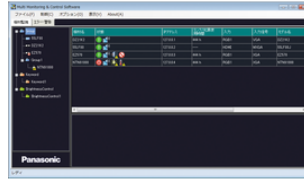

Key Features

Status of up to 2 048 devices can be checked from a single PC.

Easily manage groups of devices by "Group" or "Keyword" categories according to location or application.

Scheduled commands can be executed for a selected device or for multiple devices. Functions include control commands, image distribution, projector brightness control, delivery of a content list, Light ID control, and more.

Distribute media from a content playlist, including stills and video, from PC to selected projectors and displays. LinkRay™ Light ID transmission is also supported on selected devices.

Expend your possibilities by addding Early Warning software and add predictive maintenance and alert functions to your monitoring system.
