

## Easy to Apply Out of Stock Detection

# Captana

Enterprise IoT Sensor Fusion + Computer-Vision Platform. Captana is a cloud-based software combined with an IoT camera and sensor system that detects the on shelf availability situation and analyzes the shelf to improve shelf availability and internal processes and reduce waste.

### Key Features

---

Paperless commerce

---

Influencing responsible consumption at the shelf

---

Increased availability of products

---

Planogram compliance

---

Early detection of anomalies

---

Stockouts alerts in real-time

## Captana
