

Digital Interface Box

ET-YFB100G

By combining the ET-YFB100G with a DIGITAL LINK-ready device, video, audio and control signals can be transmitted over a single cable.

Key Features

Simplifies cabling and system upgrades, making it ideal for ceiling-mounted and other permanent installations.

Transmission up to 100m

Abundant input terminals, including two sets of HDMI and RGB inputs.

A separate audio output enables sound to be output when the display power is turned off.

ET-YFB100G input can be selected with the remote control of a Panasonic display with DIGITAL LINK compatibility.
