$\square$ Main Features
01 Detailled Clear Images
Highly detailed images in 4K resolution ( $3840 \times 2160$ ) supporting $4 \mathrm{~K} / 60 \mathrm{p}$ signals for faithful expression of high-quality content.

## 02 Useful Features for Meeting Rooms and Classrooms

Supports HDMI-CEC to control connected devices from a single remote, and external device control via RS-232C/LAN for efficient operation.
Designed for continuous 16-hour daily use.

## 03 Simple Installation

Six sizes allow users to choose the size that best suits the room space.
Equipped with built-in speakers and basic terminals, the display can be used immediately with no need for external devices.

## Clear Display of Fine Text and IIlustrations

Featuring 4 times the resolution of Full-HD, these displays clearly portray fine text and image textures. Input capability for 4K/60p signals will also support future transition to 4K systems.

## Displays in 6 Sizes Enable Effective Use of Space

Sizes are available to match everything, from huddle rooms to large conference halls. Installation is also possible at a forward inclination of up to 20 degrees to maintain legibility when mounted in high places. Built-in speakers eliminate the need for external speakers when displaying audio-equipped materials. The narrow bezels also contribute to effective space utilization.

## Other Functions

When HDMI CEC-compatible equipment, such as a DVD/BD player, is connected to the display, the display and connected equipment can be linked and operated together.

- The fan-less design minimizes operating noise even in quiet classrooms.
- Adaptive Contrast Correction maximizes the natural characteristics of the content.
- Compatible with LAN control for synchronized control or batch management over a network.
- VESA compliance allows use of general-purpose mounting brackets.
