*1 When the standby mode is set to ECO, network functions such as power on over the LAN network will not operate, and the serial output terminal cannot be used. Also, only certain commands can be received for external control using the serial terminal.
 *2 Around this time, light output will have decreased by approximately 50%. IEC62087:2008 Broadcast contents, Dynamic Contrast [3], under conditions with 35°C (95°F), 700m (2,297ft) above sea level, and 0.15 mg/m3 of particulate matter. Estimated time until light output declines to 50% varies depending on environment.
 *3 Measurement, measuring conditions, and method of notation all comply with ISO 21118 international standards.
 *4 Average light-output value of all shipped products measured at center of screen.
 *5 In AC200V, When using a projection lens other than ET-D75LE95.
 *6 Pixel-Repetition signal(dot clock frequency 27.0MHz) only
 *7 With legs at shortest position.
 *8 Without legs.
 *9 Average value. May differ depending on the actual unit.
 *10 For details on the optional lens, see the Spec File for each lens.
 *11 Please update to the latest firmware.

Shift range

Lens Shift function allows to shift the position of a projected image as shown below.

Cautions when setting up the projector

- Prevent hot and cool air from the air conditioning system to blow directly to the ventilation ports (intake and exhaust) of the projector.

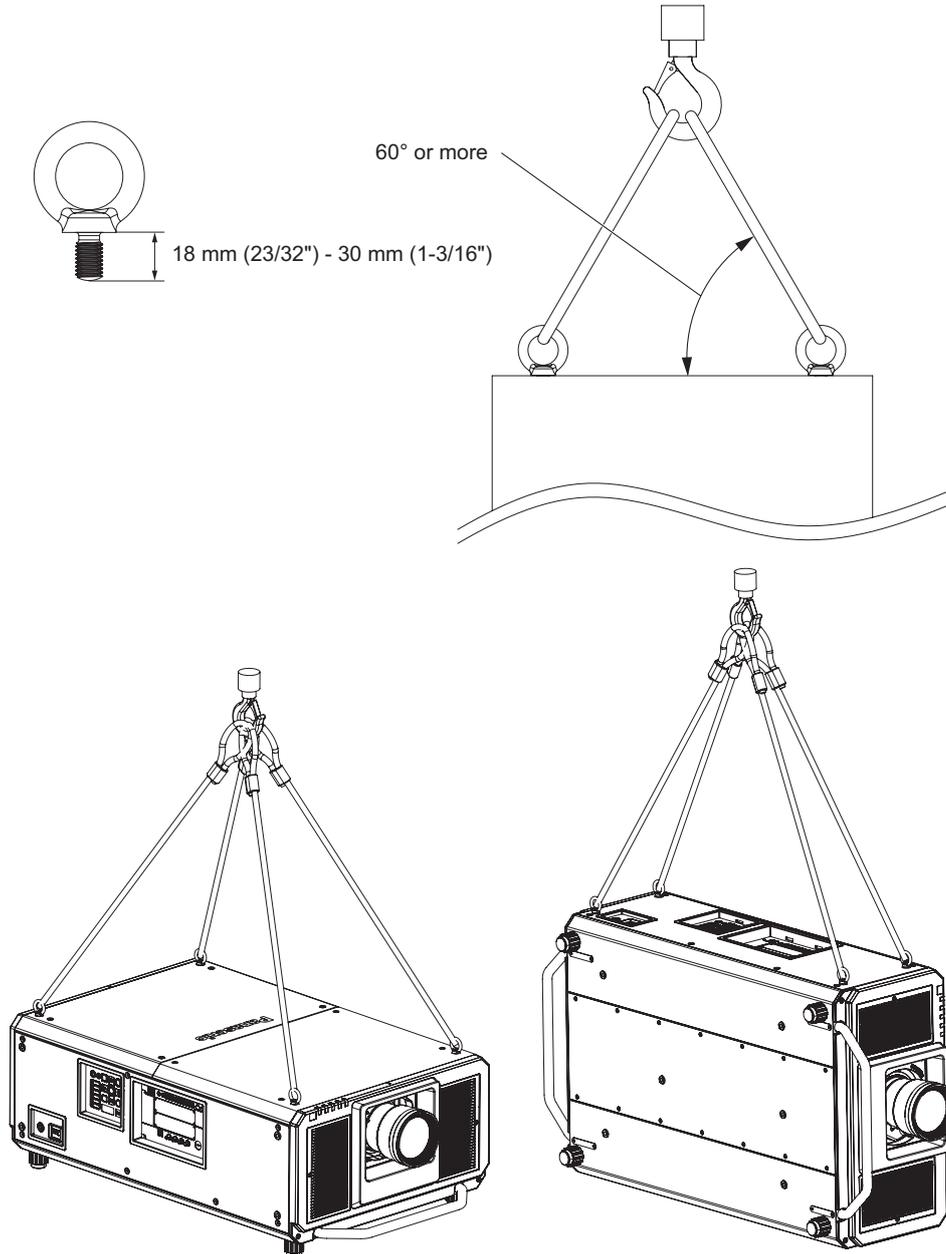

When the optional Long Life Filter Unit (Model No.: ET-EMFU330) is attached

- Do not install the projector in a confined space. When installing the projector in a confined space, provide air conditioning or ventilation separately. Exhaust heat may accumulate when the ventilation is not enough, triggering the protection circuit of the projector.
- Panasonic takes no responsibility for any damage to the product caused by an inappropriate choice of location for installing the projector, even if the warranty period of the product has not expired.

Cautions when conducting lifting work

- Use the eyebolts only when temporarily lifting the projector such as when installing the projector.
- Use ISO 3266 standard eyebolts (commercially available) for the M10 with an underhead length of 18 mm (23/32") to 30 mm (1-3/16"). Also use ISO standard parts for other components to lift the projector (wires, etc.).
- Lift the projector using the eyebolts attached to 4 locations on the same plane.
- Set the lifting angle to 60° or more.

List of compatible signals

The following table specifies the video signals that the projector can project. For details of SDI signal, refer to “List of single link SDI compatible signals”, “List of dual link SDI compatible signals”, “List of quad link SDI compatible signals”. This projector supports the signal with ✓ in the compatible signal column.

- The content of the compatible signal column is as follows.
 - 1: Single link (displays one image using one input signal.)
 - 2: Dual link (displays one image using two input signals.)
 - 3: Quad link (displays one image using four input signals.)

- NOTE:**
- A signal with a different resolution is converted to the number of display dots. The number of display dots is as follows.
- When the [ADVANCED MENU] menu → [QUAD PIXEL DRIVE] is set to [ON]: 5 120 x 3 200
- When the [ADVANCED MENU] menu → [QUAD PIXEL DRIVE] is set to [OFF]: 2 560 x 1 600
 - The “i” at the end of the resolution indicates an interlaced signal.
 - When interlaced signals are connected, flickering may occur on the projected image.

List of plug and play compatible signals

The following table specifies the video signals compatible with plug and play. Signal with ✓ in the plug and play compatible signal column is the signal described in the EDID (extended display identification data) of the projector. For the signal without ✓ in the plug and play compatible signal column, the resolution may not be selected on the computer even if the projector is supporting it.

List of dual link SDI compatible signals

The following table specifies the dual signal SDI signals that the projector can project. In addition to the standard SDI input, this supports the input from the optional 3G-SDI Terminal Board with Audio (Model No.: TY-TBN03G) installed in the slot.

- The content of the 4K division column is as follows.
 - SQ: Square (transmission format of Square Division)
 - IL: Interleave (transmission format of 2-Sample Interleave Division)

List of quad link SDI compatible signals

The following table specifies the quad link SDI signals that the projector can project. In addition to the standard SDI input, this supports the input from the optional 3G-SDI Terminal Board with Audio (Model No.: TY-TBN03G) installed in the slot.

- The content of the 4K division column is as follows.
 - SQ: Square (transmission format of Square Division)
 - IL: Interleave (transmission format of 2-Sample Interleave Division)

*1 In addition to the standard SDI input, this supports the input from the optional 3G-SDI Terminal Board with Audio (Model No.: TY-TBN03G) installed in the slot.
 *2 This is supported when the optional Interface Board for HDMI 2 input (Model No.: ET-MDNHM10) is installed in the slot.
 *3 This is supported when the optional Interface Board for DVI-D 2 input (Model No.: ET-MDNDV10) is installed in the slot.
 *4 VESA CVT-RB (Reduced Blanking) compliant
 *5 When performing the simultaneous input of the 4K image (resolution of 3840 x 2160 or 4096 x 2160) using the Interface Board for HDMI 2 input (Model No.: ET-MDNHM10), it is necessary for the firmware version of the Interface Board for HDMI 2 input to be 2.00 or later. If the version is earlier than 2.00, the simultaneous process is not performed even if corresponding signal is input. Consult your dealer regarding the version update to the latest firmware. For details on how to confirm the firmware version, refer to "How to confirm the firmware version of the Interface Board (optional)"

NOTE:

The geometric adjustment function and the expansion function by applying the optional Upgrade Kit (Model No.: ET-UK20) cannot be used when the video signal in simultaneous format is input.
