

Auto Setting Feeder Factory Solutions

For Paper and Embossing Tape reels with a Width from 4mm to 104mm

Stop Splicing and Keep the Production Running!

Your Value with Panasonic Connect

Panasonic is a global leader in the Smart Factory sector. Our unique DNA as both a manufacturer and a total solutions provider enables us to deeply understand our customers' needs, delivering tailor-made solutions for today's challenges and preparing them for the industry of tomorrow.

Autonomous setting and loading are key points for automating the supply of parts. With the revolutionary technology delivered by the Auto Setting Feeder (ASF), components are smoothly inserted into the production line, without requiring an operator to physically connect the old component reel with the new reel using splice tapes or clips.

The Supply Innovation

- Automatic supply of all tape reels for paper and embossing with a width from 4mm to 104 mm
- Functional revolution: Reduction of work effort, Reduction of loss rate and improvement of the placement rate
- Improving work efficiency for tape supply and reducing splicing stoppage rate
- Key to automation: drastically reduced set time, skilllessness & splicing-free operations
- Compatible to the Panasonic NPM series, X-series and G-series
- Up to 1min saved per loading
- Significant higher feed speed and accuracy
