

DEPLOYMENT & FULFILMENT

Multi-layered BIOS Consulting Service

Managing and customising the BIOS of mobile devices internally presents various hurdles for IT departments. Each device model may require unique customisation, making it challenging to create a standardised approach for BIOS management.

TOUGHBOOK Custom BIOS Development Service ensures a seamless start-up, supporting specific BIOS requirements and personalised default options, including your logo. Benefit from our expertise and ex-factory installation, setting the stage for a truly customised device.

TOUGHBOOK Custom Bios Development

Bespoke customer specific BIOS version

Interfaces such as USB ports, Wireless LAN, Bluetooth can be fully pre-disabled for data security

Password pre-set for enhanced security

Seamless integration with management platforms

Company logo for enhanced branding and device ownership

Complete assurance of quality across entire deployment

PROSERVICES

Streamline your BIOS deployment process

Avoid manual configuration issues as we apply settings for an out-of-the-box experience on all new devices. Save on cost and time, ensuring a smooth transition from production to end-users.

- **Cost and time savings**
- **Out-of-the-box experience for users**
- **Effortless Device Deployment Solution management solution**

Choosing Panasonic for BIOS Deployment means entrusting the process to the manufacturer.

We apply settings efficiently during production, sparing customers the burden of a potentially complex manual configuration for all new devices.
