PROSERVICES

Efficient Deployment via Gold Build, SCCM/MDT

Our Device Deployment Services cover a range of deployment methods, including Gold Build, SCCM and MDT.

Gold Build
We support Gold Build deployment option for a standardised and efficient deployment process that ensures uniformity across all devices.

SCCM/MDT
We support SCCM/MDT deployment for more customised configurations. Our experts can manage and implement network links or accommodate distribution points to support this model.

Our accurate and reliable processes ensure that every device is crafted to an exceptional standard. This commitment to standardisation guarantees unmatched quality and consistency in every deployment, setting a benchmark for excellence.

SKU	Solution Service
PCPE-PSIMG2H	Base Image Deployment (under 2 hours)
PCPE-PSIMG4H	Base Image Deployment (under 4 hours)
