

## Offline Camera Unit

Drastically reduced data creation time with the next generation powerful offline parts teaching station.

# Zero Downtime with Offline Camera Unit

---

At Panasonic Connect, we provide best-in-class manufacturing placement solutions from entry-level to more complex requirements for any mix, any volume, any time smart manufacturing.

The latest vision system Offline Camera Unit enables all component data for each machine to be created offline. Reduce the data creation time as well as manual work and realize your machine downtime zero strategy.

## Features

---

- Improvements in components installation tables and image extraction methods prevent image reacquisition and backtracking
- Easy accessibility for manual scanning
- Unified UX with machine menu
- Skillless data creation through AI engine
- All component data for each machine can be created offline
- Latest state of the art recognition camera unit as used in our placement machines
- Direct numerical adjustment of the focus for high accuracy data creation
- External reference can be set offline, no need for re-teaching at the machine
