

# What are the advantages of having a PMT DOCKING STATION For your Rugged TOUGHBOOK® devices?

# SAFETY

PMT's CNC machined aluminum constructed, ultra-slim, low profile solutions increase vehicle operator comfort and safety by minimizing protrusion and space occupied by a docked rugged device, whilst offering a secure mounting solution to reduce the hazard posed by a loose, undocked laptop or tablet.

# CONVENIENCE

Docking your device into a PMT docking station provides reliable connectivity to peripherals and charging for the device's battery power, allowing continued operation whether tackling tasks inside the vehicle or out in the field.

# DURABILITY

Manufactured from CNC machined lightweight, aircraft grade aluminum, PMT docking stations offer ultimate rugged performance in extreme conditions, for maximum uninterrupted reliability during mission critical operations.
