

Revolutionise In-Vehicle Efficiency and Communication

In today's fast-paced world, emergency services, field technicians, and recovery roadside teams face growing challenges managing mobile devices in vehicles. The Panasonic **TOUGHBOOK Screen Mirroring** solution, in partnership with VNC Automotive, efficiently mirrors critical information onto the vehicle's dashboard, providing a seamless, integrated experience.

As vehicle dashboards expand and cockpit space shrinks, traditional docking methods remain valuable, but some situations call for more flexible and space-efficient alternatives.

Panasonic TOUGHBOOK, combined with VNC Automotive's Cobalt Cube®, offers a powerful, compact solution.

Why Choose TOUGHBOOK Screen Mirroring?

Seamless Integration: Android Auto-based mirroring, compatible with any vehicle that supports Android Auto.

Remote Updates: Deploy updates to the Cobalt Cube via the TOUGHBOOK device's data connection, ensuring consistent functionality.

Comprehensive Installation and Support: Full installation and five years of support for long term reliability.

Centralised Control: Cobalt Cube enables secure integration with vehicle systems like light controls, sirens, radios, and offering a unified console-style interface.

Ready-to-Install Kit: A complete kit is provided, ready for immediate installation.

Enhancing Fleet Performance with TOUGHBOOK Screen Mirroring

Panasonic's TOUGHBOOK Screen Mirroring system duplicates the display of a TOUGHBOOK screen onto a vehicle's OEM dashboard screen, enhancing operational efficiency for field workers. Ideal for emergency services, and roadside teams who need real-time data on the go. Panasonic offers expert installation and comprehensive support services, ensuring unmatched reliability for up to 5 years—perfectly aligned with the lifespan of fleet vehicles.

Improved Efficiency

Streamline the management of work orders, navigation, and communication without the need for extra in-cabin devices or bulky docking stations.

Reduced Downtime

With Panasonic's full installation kit and ongoing support, vehicle downtime is minimised, allowing your team to stay operational when it matters most.

Future-Proof Technology

Stay up to date with the latest software developments thanks to Panasonic's unique remote update system, ensuring your fleet operates smoothly without disruptions.

Cost-Effective Solution

Reduce hardware costs and complexity by utilising the vehicle's existing infrastructure, eliminating the need for redundant screens or mounting systems.
