Intel® SDM specification Slot Standard

Panasonic slots are compatible with the Intel® SDM specification

Panasonic offers displays and projectors that are compatible with the Intel® SDM specification, a next-generation slot standard that supports 4K signals. In addition to the fixed input/output interface, the slot can be used to add optional and third party function boards*, and can be utilized for a wide range of applications such as signage, information displays in companies and schools, and entertainment. The interface board is inserted into the slot, so it does not affect the installation layout.

What is Intel® SDM?

- 4K compatible next-generation slot standard provided by Intel® "Intel® Smart Display Module (Intel® SDM)".
- There are two standards, Intel® SDM Small (Intel® SDM-S) and Intel® SDM Large (Intel® SDM-L), and our supported models are compatible with both types.

Advantages of Intel® SDM?

- No need for external players or signal conversion devices.
- No need to wire power cables, video cables, etc., allowing for a neat and tidy layout with just the display.
- System flexibility. Depending on the application, different functions can be added by replacing the function board.
- Third party function boards* can be used.

* The transmission method to the slot must be by HDMI™ signal.

Elaborate 4K Picture Quality down to the Tiniest Details

SQ2H SQE2 EQ2 CQE2

With approximately 8,290,000 pixels, about four times the pixels of a Full-HD display, images are highly detailed. This dynamic, large-screen display achieves true-to-life finely nuanced images. With an optimal viewing distance of 1.5 times the screen height, the 4K display renders the information you want to transmit with excellent clarity.

* Images are simulated.

Supports HDR and BT.2020 Emulation

EQ2

The EQ2 Series support HDR (High Dynamic Range) (PQ and HLG). Image reproduction is stunning, from deepest black to sparkling bright highlights. Additionally, they have emulation mode for BT.2020. This enables an emulation display to support the wide color gamut of the ITU-R BT.2020 standard.

Supports the Intel® SDM Specification Slot Standard

SQ2H SQE2 EQ2

The SQ2H, SQE2, and EQ2 Series are equipped with the Intel® SDM specification slot standard that supports 4K signals. Combined with the interface board, you can easily use a built-in PC and add various interfaces.

High Color Reproduction (6-Axis & 12-Axis Color Correction)

*SQ2H EQ2
*12-Axis compatible

The color space on LCD displays tends to narrow when the luminance level drops, and it's often accompanied by color phase shifts. Six Axis Coordinate Correction applies image processing to balance the six axes of the three primary colors (RGB) and their complementary colors (CMY). Further, in the SQ2H Series, the color temperature, shade, and brightness parameters of individual images can be adjusted for red, green, and blue, and their complementary colors, cyan, magenta, and yellow. This keeps the intermediate shades of extremely fine colors vibrant and lifelike.

* Images are simulated.

Portrait Installation Capability

When the Large size display is installed vertically, it can display a person in almost life-size dimensions. It is ideal for digital signage use because it faithfully reproduces the textures and colors of a model's clothing and accessories. It helps to maintain a high-quality brand image. Vertical installation also has no effect on the lifetime of the panel.

All models are supported

Easy Display of Images Optimized for the Display Content

SQ2H *SQE2 EQ2 *CQE2

*SQE2/CQE2 Series have Signage, Natural, Text, Game, and Sports mode.

Conventional display panels are preset with display modes such as Standard and Dynamic. The SQ2H, and EQ2 Series comes with an extensive display menu to let you select the most suitable mode for the content to be displayed and the viewing environment. You can select the best mode for the video source and the place of display.

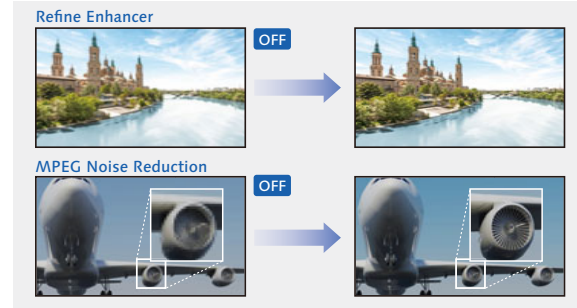

*Although the term "DICOM" is used, this product is not medical equipment. Do not use displayed images for medical purposes such as examination or diagnosis.

•Refine Enhancer

Corrects blurry image contours resulting from resizing, etc., to improve the image resolution.

•MPEG Noise Reduction

Noise reduction suppresses the block noise and mosquito noise that are characteristic of digital video signals. This faithfully reproduces the inherent beauty of the image.

Screen Monitor Function

SQ2H

This function allows you to capture the actual video output on the display and check it on a web browser via the network. In addition, "Multi Monitoring & Control Software" can be used to check images on multiple displays at the same time.

* Main software version 2.50000 or later of the display is supported.
* Images will not be displayed for PC [YPbPr] input or HDCP protected video.

Connection to an external device is convenient for video conferences

EQ2

Cisco Systems can be connected. The power supply for the display can be turned on and off by the Cisco Systems Device Controller. Or when connected to a Cisco Systems device, the video mode, video conference mode,¹ etc., can be automatically set.²

- 1: Video conference mode ... This enables conferences with minimal lag between video and audio.
- 2: External device link settings are required on the display.
- * This function is compatible with the Firmware /Main Version 2.42/ Sub Version 02.42 or later. Please contact your sales representative with regard to details.

Dynamic Signage is Possible with the Portrait Zoom

SQ2H EQ2

Split the content from image sources, and enlarge the display in a portrait orientation. There is no need to use a special device, such as a processor, while creating content from various images. Placing three 65-inch models vertically creates a display equivalent to 112 inches. This enables highly visible store signage.

HDMI™/USB/SLOT
Set to the input other than [Screen Transfer] / [MEMORY VIEWER] / [WHITEBOARD], and then set [Portrait settings].

One image can be divided into three and the area selected.

Enlarge the selected area

Three units are combined for large-screen signage.

* The picture quality may be degraded when the image is enlarged.

*These functions on the EQ2 Series: Software Main Version 2.000 or later is required. Please contact your sales representative with regard to details.

Efficiency and Reliability for Continuous 24-hour Operation

SQ2H SQE2

The use of highly durable panel materials and quality electronic components ensures dependable 24-hour operation seven days a week.

* Display of moving images is recommended when panels are in use for long periods to prevent image retention. Note that image burn-in can be gradually rectified with the periodical display of moving images.

A Stylish and slim design Accentuates the Image

EQ2

The stylish and slim design complies with the ADA standard (a depth of less than 4-inch (approx.100 mm) with brackets) in all important aspects. The narrow bezel displays higher-impact images, further enhancing the 4K picture quality. The slim profile isn't the least oppressive even when installed in a hanging configuration.

* ADA stands for the "Americans with Disabilities Act," a United States law made to protect people with disabilities from discrimination.

Fanless Design

EQ2

Standard models robust fanless design prevents problems caused by the intake of dusty air. The displays can be safely installed and operated in high-traffic environments.

Enables Writing on the Display Screen

SQ2H EQ2

The SQ2H and EQ2 Series are equipped with a whiteboard function. By setting the USB receiver of the mouse on the display, you can use the mouse to write on the display screen and zoom in/out. This is useful for facilitating efficient meetings.

HDMI™-CEC Device Linking Supported

SQ2H SQE2 EQ2 CQE2

HDMI™-CEC compatible devices can be connected to the display by an HDMI™ cable, enabling the basic operations (such as power ON/OFF) of the compatible devices to be controlled by the display's remote control. Power ON/OFF of the display can also be switched using only the remote control (or main unit buttons) of the HDMI™-CEC compatible devices.

* The control of all devices cannot be guaranteed.

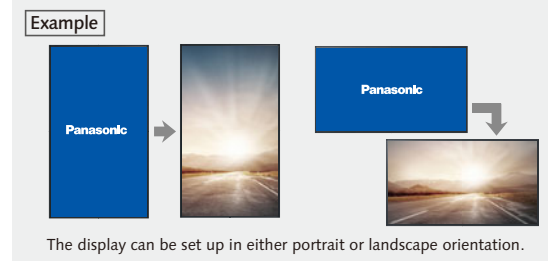

Basic operations controlled by a single remote control.

Customizable Original Screen

SQ2H SQE2 EQ2

An original image created by your company or other desired picture can be displayed when the unit is turned on and when there is no input signal. The image data for the original screen can be transferred and stored in the display unit via a USB memory. This function allows a company logo mark, brand image, etc., to be displayed when there is no input signal.

- * Certain limitations apply to the format for original screen.
- * The SQ2H/EQ2 Series is compatible with 3480 x 2160 and 1920 x 1080 resolution.
- * The SQE2 series can display any image only when there is no external signal input. Image settings when starting up the display are not supported.

The display can be set up in either portrait or landscape orientation.

4K Daisy Chain can be Constructed with Even Higher Resolution Multi-Screens

SQE2

The SQE2 Series supports 4K daisy chaining with HDMI™ input/output. Construct a multi-screen that can output 4K images by installing multiple units and connecting them in a daisy chain.

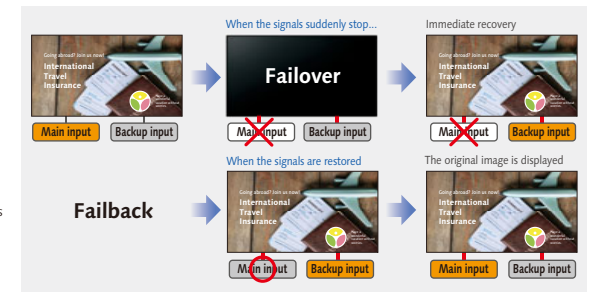

Failover and Failback Safeguards for Mission Critical Situations

SQ2H EQ2

These models are equipped with a variety of signal input terminals. If the main video and audio signals are interrupted, the system immediately switches to alternative signals. This makes it ideal for mission critical control rooms and surveillance centers. If the main signals are restored, the original image is displayed.

* The usable combinations of main and backup signals are limited. For details, see the product website.

Simple Signage Operation with No STB

* The playable application format, GUI and operation procedure for the SQE2 and CQE2 Series' Media Player function are different from those of other models.

The display can automatically start showing pictures when a USB memory containing data is inserted. The display unit can be used as digital signage without a set-top box or PC. And the content can be displayed smoothly without including the black screen display. What's more, the order of content playback and playback time can be programmed. Content can also be rewritten and multiple displays can be operated via LAN.*

- If it is difficult to insert a USB memory due to installation conditions, use a commercially available extension cable.
- Some files cannot be played back even if they are in the supported format. Regarding restrictions, see the operation manual.
- Multi Monitoring & Control Software (free) is required.

SQ2H SQE2 EQ2 CQE2

Applicable format

Still Image	JPG, JPEG, JPE, BMP*
Motion Image	AVI, MKV, ASF, WMV, TS, MTS, MP4, 3GP, MOV, FLV, F4V

* BMP is supported only by the EQ2 Series.

Playback by one unit

Simultaneous playback by multiple units

One of up to four display units becomes the parent unit, and the other units display images in sync with the parent unit. This enables the display of images in perfect sync when the panels are arranged next to each other.

Play USB Content Instantly

* The playable application format, GUI and operation procedure for the SQE2 and CQE2 Series' Media Player function are different from those of other models.

Playing Full HD video, still images, and digital documents from USB storage devices couldn't be easier. Just insert a thumb drive into the USB port and start presenting without needing to connect a PC. The Memory Viewer app enables image* (JPEG, BMP) and video* (WMV, AVI, MOV, MP4, MPG) selection from handy thumbnail previews.

- * In some cases, files may not be viewable even if they are encoded in a supported format.

Applicable format

Still Image	JPG, JPEG, JPE, BMP
Motion Image	AVI, MKV, ASF, MWW, GS, MGS, MP4, 3GP, MOV, FLV, F4V

* The SQE2 and CQE2 Series are not compatible with WMV, MTS and F4V.

SQ2H SQE2 EQ2 CQE2

Cloning Function Speeds Up Multiple Display Setup

* The GUI and operation procedure for the SQE2 and CQE2 Series' Cloning function are different from those of other models.

When installing multiple displays, the Cloning function lets you use a USB memory (or LAN network) to copy the settings of a parent display to other units, thus greatly shortening the setup time.

- [Date & Time], [Network Settings], [LAN Settings] and Display ID cannot be copied.
- The Cloning function works only for displays with the same screen size.

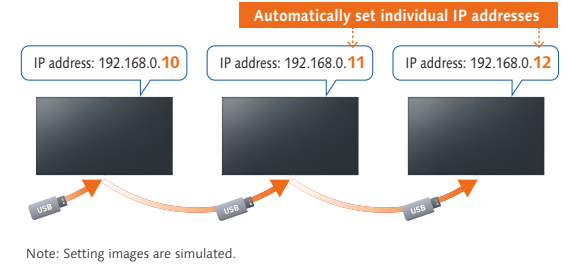

SQ2H SQE2 EQ2 CQE2

Data that can be copied
Setting and set values of [Picture], [sound], [Setup], [Position], and [Options] menus.*
* [Options] are not supported by SQ2H/EQ2.

USB Memory Network Settings

SQ2H EQ2

Using a USB memory device, the network setting can be made for multiple displays. Individual IP addresses for each unit are automatically set.

An Auto Volume Mode for Easier Listening

SQ2H EQ2

This function makes voices easier to listen to in video conferences or when the video is displayed, for improved audio quality. A setting is also possible to improve sound muffling when the display is mounted on a wall. If the automatic sound volume adjustment function is used, information sharing is possible with the sound level at a comfortable level.

- * This function on the EQ2 Series, Soft Main Version 2.000 or later is required. Please contact your sales representative with regard to details.

Make Your Signage Easy with Panasonic Application

SQ2H SQE2 EQ2 CQE2

*Synchronized playback is not available.

The SQ2H, SQE2, EQ2 and CQE2 Series features a USB Media Player function that allows easy signage playback. Content Management Software is an application software for scheduling digital signage playback on a computer. It also allows power ON/OFF to be set.

For more information about Content Management Software Version 4.0.2, please visit:
<https://docs.connect.panasonic.com/prodisplays/download/software/>

Play Content Automatically with Scheduling Function

Content Management Software for PC Version (free) enables easy playlist creation with media support including combinations of still and video images. You can set up schedules for playing and closing your media playlist at predetermined dates and times.

Convenient Playlist and Schedule Syncing

Playlists and schedules created with Content Management Software can be transferred to displays with USB memory, or via LAN. Synchronized playback on multiple displays is also supported.

Abundant Connection Terminals Enable Connection to Various Devices

SQ2H EQ2

Equipped with HDMI™ inputs (x 3), PC and USB Type-C video input terminals. Various video contents can be displayed by connecting external devices according to the operating environment. When the SQ2H and EQ2 series are connected to a PC via USB Type-C, up to 60 W of power can be supplied to the PC*.

* In this case, the slot cannot be used. The maximum power supply when using the slot is 5 V/1.5 A.

Timer-Programmable Switching of Device Connection

SQ2H EQ2

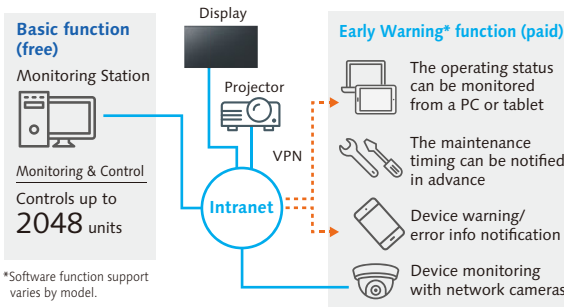

The timer function of the display unit can be used to change connected signal source devices at a desired time. This allows an easy change of displayed content according to the application or the progress of an event.

Multi Monitoring & Control Software

All models are supported

Compatible with Multi Monitoring & Control Software for addition of new functions, such as automatic searching for map displays and registered devices. Displays and peripheral equipment on the intranet can be controlled and their status can be monitored. Also error notification and error indication can be detected by an indication monitoring function (for a fee) for improved maintenance.

*Software function support varies by model.

Choose the Installation to Match Your Application

Panasonic displays are designed for use in either portrait or horizontal orientation with no effect on panel color and lifespan, further reducing TCO. A tilt installation up to 45 degrees forward or backward is also possible. The angle can be adjusted for easy viewing when installed in a high location.

* The installable angle varies depending on the model. For details, see the specifications page for each model. For more information on the specifications page, please visit the download page. (https://docs.connect.panasonic.com/prodisplays/download/spec_manual/)

Smooth Switching of Presenters

SQ2H EQ2

These displays automatically switches source signals when the input signal for the current content stops or when an input signal other than the signal of the current content is received. When presenters change during a meeting, the displayed image can be switched easily by simply changing the cable connection, thus eliminating the need to operate the remote control.

* The 2 switching inputs must be set in advance.
* This function may not operate correctly depending on the image playback device.
* Digital-digital switching is supported by the EQ Series.

Built-in Speakers for the Playback of Content with Sound

All models are supported

The display unit has built-in speakers so that it can playback content with sound without the connection of external speakers. This allows maximum use of a limited space for the installation of a large-screen display.

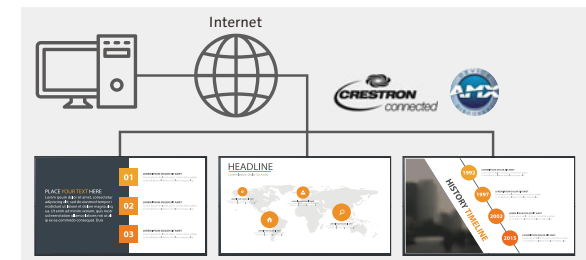

Supports LAN Control Connection

SQ2H *SQE2 EQ2 *CQE2

*AMX and Crestron Connected™ are not supported.

The display can be controlled by LAN or RS-232C. You can configure the display into your existing control system, and can control several devices simultaneously. SQ2H/EQ2 series also support AMX and Crestron Connected™ LAN control.

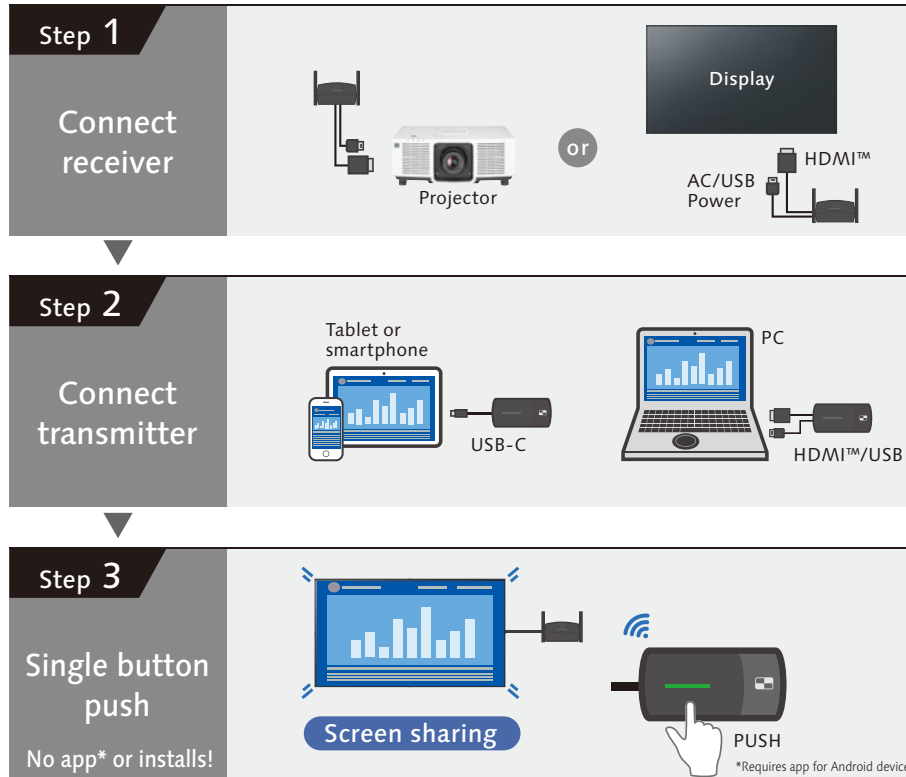

USB Pass Through Function to Save Time and Effort in Meeting Preparation

SQ2H EQ2

USB devices can be connected to the display via a USB Type-A cable and controlled using a PC connected to the SQ2H/EQ2 via the USB Type-C port. If a camera or speakerphone is permanently connected to the display in a conference room, a user can just plug in their PC and immediately control the device to start the meeting.

- 1 Easy connections with no app
- 2 Single button push a screen sharing
- 3 Multi-screen sharing up to 4

PressIT360

Providing a more realistic feeling with the 360-degree camera speakerphone

360 degree camera speakerphone
TY-CSP1

Camera	Viewing angle: 360 degrees Field of view: 360 (H) x 60 (V)
Microphone	7
Speaker	1.5 W (When supplying power from USB Type-C) or 3 W (When AC adaptor is connected)
Dimensions	Diameter φ64 mm/2.52" (excluding the pedestal part) x Height 285 mm/11.23"

Optimal Video and Audio Transmission

TY-CSP1 is a hybrid conference terminal that enables 360-degrees horizontal shooting using four cameras and features microphones and speaker that also cover a wide range of 360 degrees. It supports natural communication with people participating in web conferences with its clear sound collection and amplification.

Simple Operation

For easy set-up and use, video, audio and power are shared to the PC via a single USB Type-C cable to save labor when preparing for a meeting. Volume and Video views can be controlled using the buttons arranged on the main unit pedestal. Operating status is instantly visible from the colored LED ring on the unit, it is possible to operate it intuitively.

Installation and Portability

With a diameter of φ64 mm (2.52 inches) that is easy to grip, it is possible to freely carry it around inside the office and easily carry out web conferences. Alternatively, it can be attached to a tripod or set securely fastened with security slots.

360° camera speakerphone optimized for the web conferencing system "Microsoft Teams"

PressIT360 is certified for "Microsoft Teams," a collaboration platform offered by Microsoft Corporation. The optimal image and sound quality that naturally conveys the atmosphere of the conference room will elevate communication during web conferencing.

Panasonic display ideas for a wide range of applications

Meeting room

High image quality at 4K. Complex drawings and large amounts of text can be accurately shared. With Panasonic, a wide range of terminals are available. Can be used immediately after installing.

- Recommended models**
- EQ2/CQE2 Series >> 12p~
 - PressIT >> 28p~

Control room

Use a 24/7 operation display where interrupted images are simply not permitted.

- Recommended models**
- SQ2H/SQE2 Series >> 4p~
 - VF/LFV Series >> 32p~

Retail shop

For attractive product displays, the 4K model is also recommended for in-store signage. The narrow bezel provides effective space utilization. An easy-to-see angle can also be adjusted. And Content Management Software makes it easy to control signage for individual shops.

- Recommended models**
- SQ2H Series >> 4p~
 - EQ2/CQE2 Series >> 12p~

Classroom

Installation is possible at a forward inclination of up to 20 degrees to maintain legibility when mounted in high places. Displays course materials for easy viewing even in a bright room.

- Recommended models**
- EQ2 Series >> 12p~
 - PressIT >> 28p~

1: Bezel-to-Bezel distance means the combined top and bottom (or left and right) bezel width of adjacent displays in multi-screen. The gap between displays is not included. Note a gap of 0.5 mm (0.02") or more is required when installing multiple displays.

2: Please contact your sales representative with regard to the tilt angle before installation.

3: For up to 1400 m (4593 ft) altitude.

4: For between 1400m (4593 ft) to 2800 m (9186 ft) altitude.

5: In case of long time, the moving image is recommended to be displayed. If you display a still picture for an extended period, the image retention might remain on the screen. However, image retention can gradually disappear by displaying a moving images.

6: Multi Monitoring & Control Software Ver. 2.1 or later is required. Suffix of the part number may differ depending on the license type.

7: Download the latest Video Wall Manager from Global Website in advance. (<https://docs.connect.panasonic.com/prodisplays/download/software/vwm/>)

Narrow Bezel for Seamless Video Walls

VF2H/VF2 Lfv9

Narrow frames on Panasonic's LCD Video Wall Series reduce bezel-to-bezel distance to a near-invisible 0.88 mm*. Even when viewed close-up, screen borders are almost indiscernible, resulting in truly spectacular large-format images.

* TH-55VF2H/55VF2 features 0.88 mm (0.03"), and TH-55Lfv9 3.5 mm (0.14"), bezel-to-bezel distance. Bezel-to-bezel distance refers to the combined top and bottom (or left and right) bezel-width of adjacent displays in video-wall configuration. The gap between displays is not included. Note that a gap of 0.5 mm or more is required when installing multiple displays.

Improved Multi-Screen Video Visibility

VF2H/VF2

When high-speed video is played on multiple screens in a video wall, some image misalignment can occur between vertically adjacent panels. VF2H, and VF2 Series feature a Reverse Scan Function that alternates the scanning direction of vertically adjacent displays to improve image alignment. Frame Control Function, meanwhile, adjusts the number of video frames displayed to reproduce images with natural fluidity.

Reverse Scan Function

Reverses direction of image scanning to smoothly play enlarged video on multiple screens

Note: Images are simulated.

Delivers Stable Brightness for Up to 3 Years*

VF2H/VF2

The VF2H, VF2 Series incorporates Long Life mode and a new Auto Brightness Adjustment function. In Long Life mode, backlight brightness is optimized to extend product life. Auto Brightness Adjustment function corrects light output automatically according to the rate of backlight deterioration to maintain constant brightness for longer.

Note: Assuming operating conditions of 25 °C (± 2 °C). Environmental conditions and conditions of usage may affect brightness longevity and operating period. "On2" delivers approximately 60 % maximum specified backlight brightness. Auto brightness adjustment cannot be turned on if panel illumination period has exceeded 1,000 hours. Note: Images and graphs are simulated.

* Figure is approximate when operating continuously for 24 hours x 365 days.

Failover and Failback Safeguards Maintain Image Display

VF2H/VF2 Lfv9

Digital signal inputs comprise one or two DVI-D terminals together with HDMI, DisplayPort, DIGITAL LINK*, and USB terminals. If primary audio-video signals are interrupted, the display immediately switches to an alternative input. This makes the Panasonic LCD Video Wall Series well suited for use in control rooms and in other applications where uninterrupted playback is essential.

If AV signals via the primary input is interrupted, images are no longer displayed.

If the primary AV signal is interrupted, the system automatically switches to a backup input so video display is maintained.

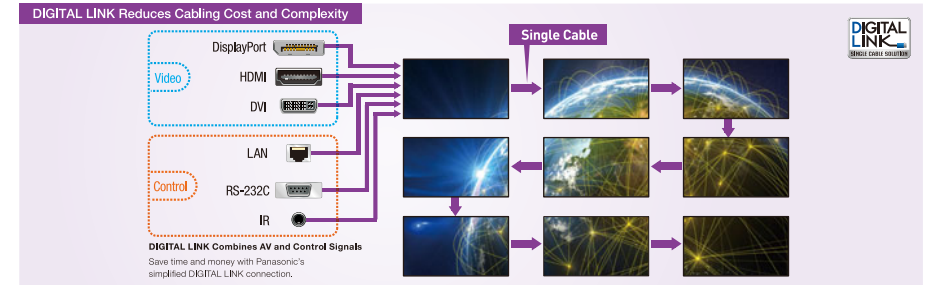

Note: Possible combinations of main/backup input signals are limited. For details, please visit the Panasonic website.

* DIGITAL LINK available on VF2H, VF2 only. Display Port available on VF2H, VF2 only.

DIGITAL LINK Simplifies Installation at Lower Cost

VF2H/VF2

Based on HDBaseT™ technology, the DIGITAL LINK connection on VF2H, and VF2 Series displays supports audio, video, and control signal transmission over long distances, and can also be used to daisy-chain multiple displays via a single cable. This eliminates the need for video splitters and other routing devices. The Lfv9 Series, meanwhile, supports daisy chain via DVI with separate video and control (serial or IR) connections. Note: CAT5e or higher STP cable required.

Installation Frame Simplifies Set-up

VF2H/VF2 Lfv9

The optional Installation Mount makes it much easier to configure a video wall. There's no need for complicated display positioning, and fluctuations between installers are covered. It also saves time and cuts labor costs.

The rigid frame is connected, so there is no need for positioning adjustment.

Automatic adjustment by surface alignment magnets suppresses surface shifting.

Video wall fluctuations occur when the bezels are not correctly aligned vertically and horizontally and the surfaces are not properly adjusted. Installation is quick and easy using the rigid frame, with easy adjustment using surface alignment magnets. This structure also makes the displays easier to remove when performing maintenance.

*Landscape setting only.

* For 55-inch TY-VK55LV2

Video Wall Manager Software and Auto Display Adjustment Upgrade Kit

VF2H/VF2 Lfv9

Panasonic's free Video Wall Manager software can be used with LCD Video Wall Series displays. With this software, you can calibrate display color using a color sensor¹ (optional), adjust display settings, and control and manage data via PC. If you upgrade this software with an optional TY-VUK10 Auto Display Adjustment Upgrade Kit, you can adjust brightness and color among multiple displays automatically using a compatible camera (Nikon D5200/D5300/D5500/D5600/D7500)².

- 1: Applicable sensors: KONICA MINOLTA (CA-210, CA-310, CA-410 [Probe CA-VP427, CA-P410, CA-P427, CA-MP410 verified as of June 30, 2020]), Datacolor (Spyder4, Spyder5, SpyderX) X-Rite (i1 Pro2)
- 2: Available only with normal zoom lens: AF-S DX NIKKOR 18-55 mm f/3.5-5.6G VR, AF-S DX NIKKOR 18-140 mm f/3.5-5.6G ED VR, AF-S DX NIKKOR 18-55 mm f/3.5-5.6G VR II, AF-P DX NIKKOR 18-55 mm f/3.5-5.6G VR

With VF2 and TY-VUK10 connected

Auto Display Adjustment Upgrade Kit: <https://docs.connect.panasonic.com/prodisplays/products/ty-vuk10/>

Panasonic Software Line-up

In order to maximize the use of professional displays, Panasonic offers a variety of software and applications (some free of charge, and others for a fee).

Content Management Software

Content Management Software makes it possible to create scheduling data and media playlist on a PC and save it to one or more USB memory. Insert the media into Space Players to execute the schedule. The software reduces complexity for temporary installations or where the device is frequently moved from place to place.

Compatible Display: SQ2H, SQE2, EQ2 and CQE2 Series
<https://docs.connect.panasonic.com/prodisplays/download/software/>

Auto Display Adjustment Upgrade Kit (TY-VUK10)

Panasonic's free Video Wall Manager software can be used with LCD Video Wall Series displays. With this software, you can calibrate display color using a color sensor, adjust display settings, and control and manage data via PC. If software is upgraded with an optional TY-VUK10 Auto Display Adjustment Upgrade Kit, brightness and color among multiple displays can be automatically calibrated using a compatible camera (Nikon D5200/D5300/D5500/D5600/D7500)*.

* Available only with normal zoom lens: AF-S DX NIKKOR 18-55 mm f/3.5-5.6G VR, AF-S DX NIKKOR 18-140 mm f/3.5-5.6G ED VR, AF-S DX NIKKOR 18-55 mm f/3.5-5.6G VR II, AF-P DX NIKKOR 18-55 mm f/3.5-5.6G VR

For more information, please visit the PASS: <https://docs.connect.panasonic.com/prodisplays/pass/>

Screen Transfer

Screen Transfer is a software that allows a computer screen to be displayed onto one or more displays of devices that are connected by wired LAN. See the User's Manual for the operating method.

Version	Ver2.0 or later	Ver. 1.0
Number of device connections	Max. 64 units	Max. 8 units
Bandwidth	Approx. 10 Mbps (regardless of the number of connected devices)	Approx. 80 Mbps (when 8 devices are connected)
Auto reconnection	Yes	—
Delivery status check	Yes	—

* Video distribution can be with existing IP network infrastructure

Compatible Display: SQ2H and EQ2 Series
https://docs.connect.panasonic.com/prodisplays/download/software/scr_transfer/

Software & App

Multi Monitoring & Control Software

This free Panasonic software offers monitoring and control of up to 2,048 projectors and professional displays over a LAN network from a single PC to simplify management and maintenance while supporting stable operation. If you also purchase Early Warning Software (ET-SWA100), it will monitor the status of projectors and displays on the intranet and inform you of errors when it detects signs of trouble. This contributes to a lighter maintenance load and reduces costs.

* Software function support varies by model.
 * Multi Monitoring & Control Software Ver. 2.0 or higher is required to use the Early Warning function.

Features

• Map Display

Image files, such as floor plans, can be loaded, and the icon for each device can be positioned by 'Drag & Drop'.

• Auto Search of the Devices to Be Registered

You can select the devices to be registered from devices automatically searched on the network.¹

• Other Features

- Monitoring of the status of each device²
- Execution of control commands
- Scheduling function
- Delivery of the contents list³

Early Warning Function (ET-SWA100)

Maintenance Scheduling Suggestion³

It is easier to plan for maintenance by predicting the approximate time for maintenance and service based on the usage monitoring.

Video Stop Detection Using a Network Camera

Images of registered projectors or displays can be monitored regularly by a supported network camera. You can also receive a notification when an abnormality such as a blackout or an image freeze happens.

If you install 'Multi Monitoring & Control Software,' a free 90-day trial is automatically available.

Captured image when an abnormality happens is stored

1: Some devices can't be registered using the auto search function depending on the device status and network environment.
 2: Software functionality varies depending on the model. 3: Function for supported projectors and professional displays only.

For more information about compatible displays, please visit the Website:
https://bizpartner.panasonic.net/public/ppr/file_view/204673

Early Warning function License * If you install "Multi Monitoring Control Software", a free 90 day trial.
 For more information, please visit the PASS: <https://docs.connect.panasonic.com/prodisplays/pass/>

* The number of connections and functions may vary depending on the model. Please refer to the web for details.

The specification has a case to change without notice.

1: Some functions are not supported.

2: Please use in an environment below 35°C (95°F) when display is portrait orientation.

3: Please use in an environment below 35°C (95°F) when display is landscape orientation.

4: LAN control is not supported. Daisy chain connections with DIGITAL LINK are limited up to three units.

5: 4K signals are not supported. (75/65/55/50/43SQE2)

6: The part number suffix may differ on the license type. Multi Monitoring & Control Software Ver.2.0 or later is required.

1: Long Reach Mode compatible. 2: Multi Dynamic Backlight 3: Local Dimming on Lfv9 Series is always set.
 4: The playable application format, GUI, and operation procedure for the SQE2/CQE2 Series' Media Player function areas different from of other models.
 5: The SQE2/CQE2 series can display any image only when there is no external signal input. Image settings when starting up the display are not supported.
 6: Some models only support IR connection.
 7: There are restrictions on the input signal and 4-Input Multi Display function. 3G-SDI input and 4K images are not supported by the 4-Input Multi Display function. For details, see the operating instructions of each model.
 8: This function is compatible with the Software Main Version 2.2000 or later. Please contact your sales representative with regard to details.

Note: The specifications may vary depending on the model, even for the same function.
 For details, see the operating instructions of each model.

1: Long Reach Mode compatible. 2: Multi Dynamic Backlight 3: Local Dimming on LFFV9 Series is always set.
 4: The playable application format, GUI, and operation procedure for the SQE2/CQE2 Series' Media Player function areas different from of other models.
 5: The SQE2/CQE2 series can display any image only when there is no external signal input. Image settings when starting up the display are not supported.
 6: Some models only support IR connection.
 7: There are restrictions on the input signal and 4-Input Multi Display function. 3G-SDI input and 4K images are not supported by the 4-Input Multi Display function. For details, see the operating instructions of each model.
 8: This function is compatible with the Software Main Version 2.2000 or later. Please contact your sales representative with regard to details.

Note: The specifications may vary depending on the model, even for the same function. For details, see the operating instructions of each model.

Panasonic CONNECT

Weights and dimensions shown are approximate. Depending on the temperature or humidity conditions, uneven brightness may be observed. This is not a malfunction. This unevenness will disappear while applying current continuously. If not, consult the distributor. Specifications and appearance are subject to change without notice.
