

# Seamless Private 5G Networks

Reliable connectivity is essential for mission critical applications like automation, IoT and real-time analytics. Traditional solutions like WiFi, Bluetooth, and public cellular networks fall short due to range, reliability, and security limitations. A dedicated on-premises network is key to unlocking the full potential of a connected future.

With the combined expertise of Panasonic and COCUS, we will deliver a fully secure and scalable Open-RAN solution, from network connectivity to the specific requirements of your applications. From planning to support, our customer-centric approach ensures seamless integration and optimised performance for industrial connectivity.

## Why Choose Panasonic + COCUS?

Industry-leading expertise in rugged 5G ready computing and networking

Open-RAN technology for secure, scalable private networks

Customer-centric approach resulting in tailored network solutions specific to business needs

One provider for all network needs—from consulting to deployment and support

Seamless integration with existing infrastructure and devices

5G SA rugged devices for seamless, high-performance connectivity

**PROSERVICES**

# End to End 5G Network Service

## Our Approach

Our streamlined, collaborative approach ensures a smooth transition from concept to fully operational private 5G networks, including support throughout.

1

### Consulting & Licensing

Support and guidance with private 5G spectrum application.

2

### Network Planning

Infrastructure assessment, site surveys, and defining key network parameters.

3

### Proof of Concept (PoC)

Scaled deployment in a controlled environment to test coverage, performance and functionality.

4

### Full Rollout

Network expansion, provision of core network redundancy, and indoor coverage integration if required.

5

### Ongoing Support

Flexible service plans for remote and on-site assistance, with replacement parts for rapid issue resolution.

## Scalable Starter Kits

No matter the size of your project, we offer customizable PoC starter kits with the essential hardware components needed to bring your proof of concept to life.

Partner with Panasonic & COCUS for a seamless, high-performance 5G private network solution that meets your business needs today and scales for tomorrow.
