

## Data Act Notice - Panasonic Media Processor (FMP series)

Panasonic is committed to ensuring that any data generated by our connected products and related services is used fairly, lawfully, and securely. We place high importance on compliance with Regulation (EU) 2023/2854 (the “Data Act”)

This Notice is intended to tell Users which data can be generated by the products we sell and our related services. Where we are Data Holder under the Data Act for data generated by our products or related services, we will also tell you how we use such data, what rights and obligations users have for such Data, how users can get access to such Data and where to go in case of complaints. You will also find contact information for any questions related to data handling.

This Notice must be read jointly with, and is without prejudice to, the applicable data privacy notice, which shall prevail over this Notice as concerns personal data.

### DATA GENERATED BY OUR PRODUCTS

Our products and services can generate data on an ongoing data, please see information below. Such product data can be accessed and used for diagnostics purposes in case a product is handed over for service and maintenance. Where we access such data for diagnostic purposes, the data will not be exported or used for other purposes and will be deleted after the diagnostic is done.

The overview of the data generated on your use of the Product(s) is set out below.

Which data are being collected	Format and expected data volume	Collection Frequency	Storage	Duration of retention	How can it be accessed?	How the user may erase the data
Status information (power information), number/string	Format:JSON < 1 kbyte per session	Logged when event occurs	Internal Storage of the device	Power-on data retention	Accessible only on the device as follows: Accessible via Web UI display .	Not applicable
adjustment information, numeric	Format:JSON < 10 kbyte per session	Logged when event occurs	Internal Storage of the device	Indefinite	Accessible only on the device as follows: Accessible via Web UI display .	The user can erase it from the operating menu.
Playlists, schedule files	Format:XML < 5 kbyte per session	Logged when event occurs	Internal Storage of the device	Indefinite	Accessible only on the device as follows: Accessible via Web UI display .	The user can erase it from the operating menu.

Panasonic is the initial seller of the connected product. If the connected product is (re)sold, leased, or rented, it will be up to each reseller, sub-lessor or sub-rentor to comply with the pre-contractual information obligation outlined in Article 3(2) of the Data Act. The reseller, sub-lessor or sub-rentor must provide a copy of the information contained in this Notice to the repurchaser, sub-lessee or sub-tenant.

### CONTACT

For any questions regarding the handling of data, request access to the data or technical issues with access, please contact us at:

## Annex: DATA LIST

Which data are being collected	Format and expected data volume	Collection Frequency	Storage	Duration of retention	How can it be accessed?	How the user may erase the data
temperature information, numeric	Format:JSON < 1 kbyte per session	Regularly Retrieved	Not stored	Power-on data retention	Accessible only on the device as follows: Accessible via Web UI display and command communication.	Not applicable
barometric pressure information, numerical values	Format:JSON < 1 kbyte per session	Regularly Retrieved	Not stored	Power-on data retention	Accessible only on the device as follows: Accessible via Web UI display and command communication.	Not applicable
angular information, numeric	Format:JSON < 1 kbyte per session	Regularly Retrieved	Not stored	Power-on data retention	Accessible only on the device as follows: Accessible via Web UI display and command communication.	Not applicable
AC voltage information, numeric value	Format:JSON < 1 kbyte per session	Regularly Retrieved	Not stored	Power-on data retention	Accessible only on the device as follows: Accessible via Web UI display and command communication.	Not applicable
luminance log, string	Format:JSON < 10 kbyte per session	Logged when event occurs	Internal Storage of the device	Indefinite	N/A (not readily available data)	Not applicable
system log, string	Format:JSON < 10 kbyte per session	Logged when event occurs	Internal Storage of the device	Indefinite	N/A (not readily available data)	Not applicable
ID info, number/string	Format:JSON < 1 kbyte per session	Logged when event occurs	Internal Storage of the device	Indefinite	Accessible only on the device as follows: Accessible via Web UI display and command communication.	Factory reset by user initialization
network information, numeric	Format:JSON < 1 kbyte per session	Logged when event occurs	Internal Storage of the device	Indefinite	Accessible only on the device as follows: Accessible via Web UI display and command communication.	Factory reset by user initialization
